

Your Seasonal Flu Shot was...

INCOMPLETE

Each year, a new seasonal flu vaccine is prepared that will be effective against the expected type of influenza virus. The trick is to be able to predict which influenza viruses are going to cause infection. But, yours was INCOMPLETE. The element that protects you from the H1N1, or Swine Flu, strain was not included in that vaccine.

H1N1, or the Swine Flu, is a serious health condition that affects your lungs, and it is considered widespread in Southwest Florida. ANYONE can catch it, just like the seasonal flu. If you feel strongly enough to get the seasonal flu vaccine shouldn't you complete it? Get your Free H1N1 Vaccine today.

If you have concerns about the safety or effectiveness of the vaccine CALL YOUR DOCTOR TO TALK ABOUT IT or you can visit www.MyFluSafety.com.

The Lee County Health Department is providing

Free H1N1 Vaccinations

Visit www.LeeCHD.com or call 211 for free clinic locations and hours.
